SUMMARY

I am an applied development researcher with over two years of experience delivering policy-focused analysis for government and international clients, such as GIZ and the British Embassy Jakarta. I have strong quantitative skills in data analysis, machine learning, and AI-assisted workflows using Python and R. I also have a track record of turning complex socioeconomic data into practical policy recommendations. I am currently studying a Master of Environmental and Resource Economics at the ANU Crawford School of Public Policy. My background covers regional development planning, Islamic finance, and sustainability policy, with experience from more than 15 commissioned research projects.

EDUCATION

UNIVERSITAS Indonesia, Depok, Indonesia (2019 - 2023)

Bachelor of Islamic Economics (S1) – GPA 3.86

AUSTRALIAN NATIONAL UNIVERSITY, Canberra, Australia (2026 - Present)

Master of Environmental and Resource Economics (Crawford School of Public Policy)

WORK EXPERIENCE

Software & Tools: R, Python, Excel, Smart-PLS

Methods: Data Visualization, Data Scraping, Linear Models (Cross-sectional, Time Series, Panel Data), Forecasting (ARIMA, SARIMA, ETS), Structural Equation Modeling, Machine Learning (Random Forest, XGBoost), Financial Modeling, Risk Analysis, Content Analysis, Sentiment Analysis

PROJECTS AND RESEARCH EXPERIENCE

Featured Projects

Research Assistant - Evaluation of Sustainable Plantation Planning in East Kutai (GIZ, Feb-Jul 2025)

- Analyzed plantation coverage, palm oil GDP, compliance records, and land conflict data to assess regulatory gaps in sustainable plantation implementation
- Contributed to stakeholder interviews and FGDs with government officials, plantation companies, and individual farmers to validate findings
- Co-authored policy recommendations covering regulatory reform, integration of plantation plans into regional budgeting cycles, and development of a cross-sectoral action plan across 12 strategic issues

Research Assistant - Long-Term Regional Development Plan 2025-2045, East Kutai Regency (East Kutai Regency Government, Jan-Dec 2024)

- Analyzed socioeconomic, demographic, and budget data to assess regional development trajectories across key sectors
- Identified unachieved development targets and diagnosed root causes through structured analytical frameworks and FGDs with regional stakeholders
- Formulated policy recommendations and long-term goal orientation based on data analysis and feasibility assessment

Research Assistant - Mapping of Business and Economic Potential, East Kutai Regency (East Kutai Regency Government, Jun-Aug 2025)

- Contributed to primary data collection across 18 sub-districts through field surveys and stakeholder interviews as part of a research team
- Integrated primary findings with BPS commodity statistics and PODES village potential data to build a comparative baseline across sub-districts
- Identified priority commodities and industries per sub-district based on resource potential, infrastructure readiness, and market feasibility

Research Assistant - Unlocking Indonesia's Islamic Finance Market Potential (British Embassy Jakarta, Dec 2024-Mar 2025)

- Analyzed demand-side and supply-side data across Islamic banking, capital markets, and non-bank financial institutions (insurance, pension funds) to assess market depth and growth constraints
- Examined firm-level performance metrics and asset data to benchmark Indonesia's Islamic finance sector against its potential
- Contributed to a policy report, policy brief, and public discussion forum on strategic recommendations for Islamic finance development in Indonesia

Other Research Projects

- Study on the Hajj and Umrah Ecosystem (BPKH, December 2025)
- Strategic Plan for the Office of Population Control and Family Planning (East Kutai Regency Government, Sep-Nov 2025)
- Gold Investment Study (BPKH, Sep-Nov 2025)
- Identification of Transmigration Area Potential in East Kutai Regency (East Kutai Regency Government, Aug-Nov 2025)
- Roadmap for Sharia-Based Tapera Program (BP Tapera, Jul-Sep 2025)
